AI/ML Consultant with hands-on experience developing Generative AI and LLM applications, RAG pipelines, AI agents, conversational AI, and document automation workflows. Strong in Python, LangChain, OpenAI API, Ollama, Qwen, embeddings, vector databases, FastAPI, Flask, MongoDB, and AWS. Experienced in multi-step AI workflows integrating LLMs with application APIs and databases, with measurable impact including 70% less manual effort and processing time reduced from 1 hour to 10 minutes.

WORK EXPERIENCE

Harshwal & Company LLP (AI/ML Consultant)

2025 - June 2026

- Developed LLM-powered AI agents and multi-step Generative AI workflows using Python, LangChain, OpenAI API, Ollama, and Qwen. Designed RAG pipelines using document chunking, embeddings, vector search, contextual retrieval, conversation memory, and document-grounded responses.
- Integrated LLM applications with APIs and databases; worked with MongoDB and AWS services including EC2 and S3 for production-oriented AI solutions.
- Built AI automation workflows that reduced manual effort by 70% and reduced selected process time from approximately 1 hour to 10 minutes.
- Delivered solutions supporting 100+ documents and 100+ generated outputs for approximately 10-100 users.

Harshwal & Company LLP (SEO Executive/Digital Marketer)

2023 - 2024

- Applied data analytics to optimize search performance, campaign outcomes, and organic visibility.
- Used AI-assisted analysis for keyword research, content analysis, competitor research, and performance insights. Managed on-page and off-page SEO activities using data-driven optimization.

Pai Hygiene & Health Care (Digital Marketing Manager)

2021 - 2023

- Developed and optimized Google Ads, Meta Ads, and social media campaigns to improve lead generation. Analyzed campaign performance data to identify optimization opportunities and improve ROI. Implemented SEO strategies to improve organic search visibility and website traffic.

SELECTED AI PROJECTS

DocLink: AI-Powered Document Management & Client Engagement Platform

(Python, Flask, MongoDB, LangChain, Qdrant, Qwen, Sentence Transformers, AWS S3)

- Contributed to a professional document exchange and client engagement platform with AI-powered document assistance.
- Implemented RAG components including document chunking, embeddings, Qdrant vector search, contextual retrieval, and document-grounded Q&A.
- Implemented conversation memory and document citations for answers generated from uploaded document content. Integrated AI capabilities with Flask, MongoDB, and AWS S3; supported large-file workflows up to 2 GB per file.

Engagement Letter & Request for Records Generators

(Python, LLMs, OpenAI API, Prompt Engineering, API/Database Integration)

- Built multi-step AI automation workflows for tax-process document generation, from collecting required files and information to generating final documents.
- Integrated AI workflows with application APIs and databases and automated repetitive document-generation tasks.

Text-to-Speech AI Application

(Python, FastAPI, Next.js, MongoDB)

- Built an AI text-to-speech web application with a FastAPI backend and Next.js frontend.
- Implemented MongoDB storage for user accounts and audio-generation history and worked with async Python.

EDUCATION

Professional Certification Programme in AI/ML | IIT Patna

Pursuing

B.Tech Computer Science Engineering | Maharani Girls Engineering College (RTU)

2019

TECHNICAL SKILLS

Generative AI: LLMs, RAG, AI Agents, Prompt Engineering, Conversational AI, Document Intelligence

LLM Stack: LangChain, OpenAI API, Ollama, Qwen, Hugging Face, Sentence Transformers

Retrieval & Data: Embeddings, Vector Databases, Qdrant, MongoDB, PostgreSQL

Programming: Python, SQL, Async Python

Data & ML: Pandas, NumPy, scikit-learn

Backend: FastAPI, Flask, API Integration, JWT Authentication

Cloud: AWS EC2, AWS S3, AWS IAM

DevOps: Docker Compose, Git, GitHub

Tools: VS Code, Google Colab, Vibe Coding
